ICS: CALL TO ACTION- THE SUSTAINMENT CHALLENGE
Prepare Yourself for the Unthinkable

San Luis Obispo, CA -- February 4, 2008 -- A first responder may go through their entire career without encountering a CBRNE incident - but when it happens, it can be fatal. This is a unique opportunity to hone your skills and receive refresher training in a fast paced environment. Rely on your knowledge and experience to successfully complete the simulation minimizing casualties. *ICS: Call to Action - The Sustainment Challenge* is a deadly serious “in-the-game, boots-on-the-ground” immersive simulation that puts your first responder and team-building skills to the ultimate test. People will live or die based on your many decisions. You are the Incident Commander as a deadly anthrax plot unfolds. Since “one size” doesn’t fit all, the interactive training allows the user to play from the perspective of any one of six first responder roles: Fire Chief; Police Chief; EMS Chief; EMA Chief; Hazmat Chief; or, Public Health Officer.

Invest in training for long term success through this low cost refresher training. Visual Purple offers an interactive exercise solution that utilizes the latest technology available to master and sustain critical incident management skills. Put yourself in the driver’s seat as Incident Commander for the low cost of only \$9.99. Visual Purple challenges you to hone your skills and test your mettle...at the scene of a CBRNE incident, what would you do?!

Visual Purple has created a wide variety of training simulations for government agencies, the military, and Fortune 500 companies. The Visual Purple ICS Training Series encompasses training requirements for all first responders as mandated by FEMA and NIMS, through Presidential and Homeland Security Directives Five and Eight. Enhanced technology and cinematic storylines make Visual Purple simulations entertaining, while educating the learner on ICS 100 and 200 level concepts.
