FOR IMMEDIATE RELEASE

Visual Purple Awarded R23G Contract Through ACET Team

San Luis Obispo, CA –July 30, 2009 – The R23G \$16.4 Billion dollar multiple award ID/IQ contract awarded to the ACET Team. Adams Communication & Engineering Technology (ACET), Inc. has been awarded a PRIME contract on the \$16.4 Billion dollar Rapid Response 3rd Generation (R23G) program by the Army’s Communications & Electronics Command (CECOM). This is the Army’s largest IDIQ contract and has a 5 year term and spans both CONUS and OCONUS (worldwide) locations. Other prime contractors include Lockheed Martin, General Dynamics, Booz Allen, Raytheon, and Computer Science Corporation. Visual Purple, LLC is a subcontractor to ACET for this effort.

R2-3G is the U.S. Army Program Communications-Electronics Life Cycle Management Command’s follow on contract to the current Rapid Response (R2) contract. This is a multiple award IDIQ vehicle to provide critical equipment and engineering services to government system, platform and item managers worldwide.

About Visual Purple, LLC

Visual Purple is an industry leader in advanced simulations and technologies throughout the Virtual World, Embedded and Decision-Based training sectors. The Company’s core technologies allow for the rapid development of training objectives within its simulations through a collection of 3D elements, videos, and other high-fidelity content. Visual Purple training solutions allow for the most complex training missions in a manner that is cost and time efficient for the organization and enjoyable and effective for the trainee. Training packages are designed to accelerate the ability of corporate and government employees to master complicated material and increase performance in making appropriate work-related decisions. Visual Purple, LLC is certified on the Central Contractor Registration database as a Women-Owned Small Business.
